QUESTIONS AND ANSWERS ABOUT GENESIS TREATMENT

WHAT DOES IT FEEL LIKE?

The laser produces a gentle warm feeling during treatment, which most patients describe as soothing and relaxing. Immediately following the treatment, the warm feeling can continue for about thirty minutes. Some patients report a pleasant, mild, tingling feeling, and a feeling of firmness for a day following the treatment. Because the procedure is quite comfortable, no gels, anesthetic creams, or ice are necessary prior to the treatment.

HOW LONG DO THE TREATMENTS TAKE?

The treatment usually takes about 45 minutes for the face; less for the other areas.

HOW MANY TREATMENTS ARE NECESSARY?

Every patient's condition and needs vary. However, the number of treatments recommended for optimal results are 4 treatments, 2-4 weeks apart.

RESULTS—WHAT SHOULD YOU EXPECT?

The individual treatment results are subtle, but the overall effect of multiple treatments can be quite dramatic. Over the course of treatments, the laser can help restore your skin's youthful glow and appearance.

HOW LONG DOES IT LAST?

The results continue to accumulate after each treatment and last far beyond your last treatment. Because the natural aging process continues, it is difficult to state precisely how long the treatment can last. However, benefits seem apparent for an average of at least 9-12 months afterwards, depending on the baseline skin condition and the attention paid to proper skin care maintenance.

WHAT AREAS CAN BE TREATED?

The face, neck, and chest for both men and women have shown excellent treatment results.

IS IT SAFE?

Complications are rare and usually minor. Unlike other skin resurfacing procedures, the surface of the skin is not disturbed.
