

Terri Fabula, CDT  
Clinical Densitometry Technologist

Terri is a retired radiology technologist who now devotes her time to working in the field of bone densitometry. She obtained her certification in bone densitometry through ISCD in January of 1998 and has worked both at GBMC doing research studies in bone loss and at the Osteoporosis & Metabolic Bone Center in Owings Mills. Additionally, Terri has created brochures on osteoporosis and bone care for the Metabolic Bone Center in Reisterstown and has written several informative articles on bone health for the Internet while working at the Center.

Her years of experience performing bone densitometry scans to monitor the progress of research study patients with metabolic bone disorders as well as her continued personal interest in this subject has made Terri an excellent go-to person for patients requiring education on maintaining the health of their bones.

Terri is a graduate of Towson University (Dean's List) with invitation to join the Golden Key International Honor Society.

Her hobbies include illustration (both traditional and digital) and creative writing.
